RIVERSIDE AER-DUCT HEATER

Guaranteed Fire-keeper

A soft coal Base-Heater which has stood the test for twelve years, more popular today than ever. The patented Aer-Duct principle heats the ash pit—a perfect hot base. This greatly increases the heating power. The patented hot blast slotted fire pot makes a hot, smokeless fire with any fuel.

HEATS LIKE A FURNACE
Downstairs and Upstairs

The large corrugated warm air flue directly over the fire heats large volumes of air by circulation and gets many times as much heat from the same fuel. Come in and we'll show you how the Riverside Aer-Duct heats like a furnace and why it never needs flue cleaning.

WANT PAY FOR FIGHTING TOWNLEY—UNAUTHORIZED

A letter to the editor of the Democrat from D. J. Fair of Sterling, Seventh district leader of the American Defense League of Kansas, is to the effect that persons are offering their services for pay to make speeches against Townleyism. It seems that some of these persons are claiming authority of the state organization. Mr. Fair wishes it understood that such is not the case. Every officer and speaker of the organization work without pay and unless a speaker has credentials from the state officials he has no standing with the league.

Mr. Fair says work is progressing steadily and plans are being worked out to combat the menace of Townleyism in the Sunflower state.

Society Brand Suits and Overcoats

The laws of the land and social custom demand that we wear clothes, but, fortunately, these set no standard, leaving to every man the privilege of dressing according to his taste. This enables men to possess an individuality in their clothes just as in their habits. This is one of the big reasons for Society Brand Clothes. They are made of materials and in shapes which give ample latitude in the expression of his individuality. And this is also the reason you will find the Society Brand Clothes at so many social functions and business conferences. They are made for men of standing, and they help men to attain that standing.
